2010 September Community meeting in Oslo, Norway

Extensions

New

- **Online Image Editor 1.0: ezie (former epie)**
Real online editing of images incl watermark, rotating, resizing and other common tasks.

Updated

- **Online Editor 5.2: ezoe**
Updated TinyMCE to 3.3.x with better past handling, working closer to default TinyMCE setup and improved handling
- **eZ Find 2.3: ezfind**
Improved spellcheck, autocomplete suggestions, initial support for geographic searching, better ezfind fetch functions for faster fetches on complex dynamic pages and possibility to search across several indexes
- **eZ Oracle 2.1: ezoracle**
DFS and DB cluster support

eZ Publish

- Anonymous session support
- Improved eZ INI performance
- Continuous improved usability in admin2
- Extension loading order
- Host Uri matching
- SMTP SSL support
- Session handler support (files & db)

eZ Publish

- GIT for easier contributions
- eZPersistentObject implementation to ezpending_actions by community
- Improvements to multisite multi db setups
- Improved ini loading for ActiveAccessExtensions and siteaccesses in extensions throughout the kernel
- Improved static cache
- Improved clustering with reduced queries involved and mysqli handlers

And hundreds of other bug fixes and
enhancements!
