twitter notification

Tasks - Edit

Description:

As a community member, i would like to be able to follow the eZ Community activity on twitter.

I would also like to make new contacts through twitter.

This allows me to be notified though another channel than the existing ones (rss, mail notifications when tracking a piece of content) and be sure i am not missing anything.

Tasks:

Add task

● Choose what type of content is pushed through twitter

No one committed to this task | Last change at 18/12/2009 3:48 pm

blog posts, articles should probably be pushed through. How about forum posts and replies ?

The right balance between abundance and pollution should be found.

Deliverable :
The list of content types pushed on the twitter channel.
This list should be reviewed when the activity of share.ez.no changes (every 3 months maybe ?)

● Spot the tool to push to twitter   *No one committed to this task*

● Integrate on the platform the tool chosen to push to twitter   *No one committed to this task*

● Find the tool to show a twitter feed on the home page (and others, maybe)   *No one committed to this task*

● Integrate the tool chosen to "live" feed on the homepage   *No one committed to this task*

How to join ?

- Just drop an email to

  community@ez.no

Thanks for your attention
